

I want to migrate from dropbox to google drive

 Do you want to change your principal cloud storage?
Start by selecting your endpoints.

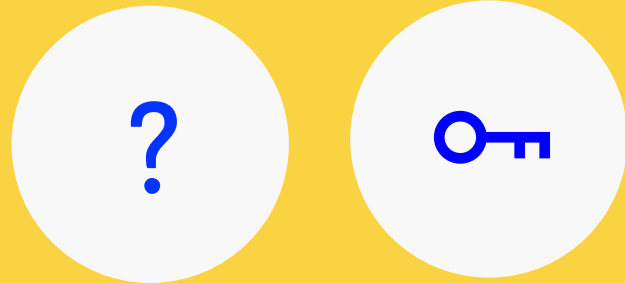

I want to **migrate** ← Copy all files from source to destination
back-up
copy

I want to migrate from dropbox to google drive

Start now

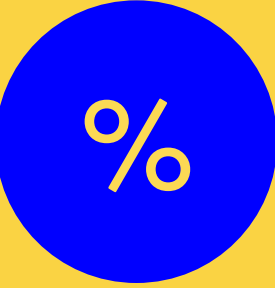

I will sign up with
 facebook  twitter

I will sign up with

We will need to confirm your address if you choose e-mail.

 **Connect Dropbox**

 **Connect Google Drive**

Connect your selected endpoints using your accounts.

Select Files

Copy all files to root

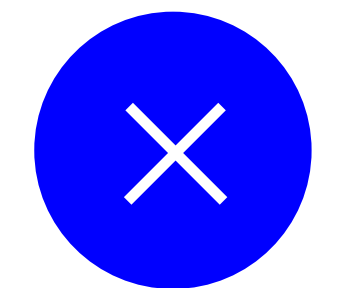

I want to copy ❖ all files to / (root)

You can either copy all files to root or select specific folder

Run transfer

Schedule transfer

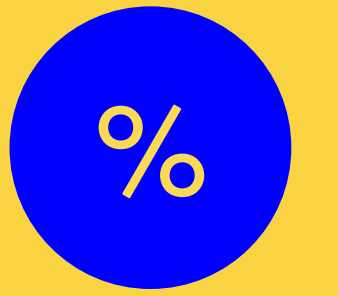

Filter

Filter current list of files

/ Root folder

- file.txt Select
- folder ▼
- file2.txt
- image.jpg
- file3.txt
- file4.txt
- image2.jpg
- another folder transfer 🗄️

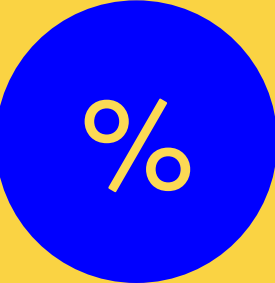

I want to run transfers once a week - starting on Monday ↔ 12:00 AM ↔

You can either copy all files to root or select specific folder

[Run transfer](#)

I want to copy one a week - starting on Monday ↕ 12:00 AM ↕

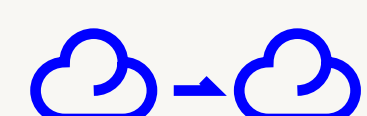

You can either copy all files to root or select specific folder

Run transfer

To start your transfer just start selecting endpoints or press "Start now" button

Datacab is simple web tool for synchronisation of remote servers and cloud storages. It solves the problem of low-speed uploads by using high-bandwidth servers for all your data transfers. Datacab allows you to save hours of time by performing following tasks with surprising speeds:

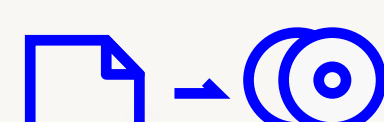

Cloud migrations

Migrate without having your home channel overloaded.

Website migrations

Migrate from one hosting to another without having to download all the data.

Back-up anything

Make ultrafast scheduled back-ups to preserve data.

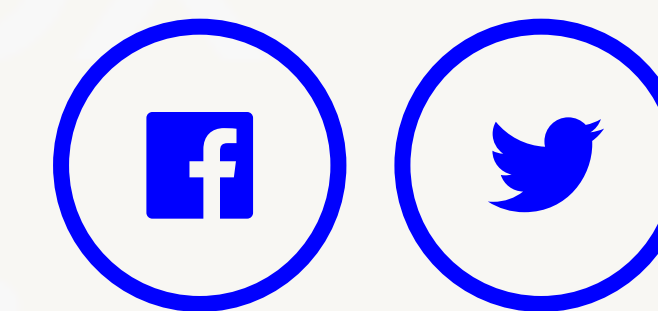

Copy directly

Copy bulky files from server to server directly.

Your e-mail

Password

Sign in

To sign up, just start a transfer.
